Keynote Speakers this year are:

Patricia Ganey, Ph.D.
Professor
Dept. of Pharmacology and Toxicology
Michigan State University
Lansing, MI

Lois D. Lehman-McKeeman, Ph.D., ATS
Vice President, Pharmaceutical Candidate Optimization, Bristol-Myers Squibb
Princeton, NJ

Fields of Interest: Dr. Ganey’s research focuses on understanding mechanisms by which inflammation modulates responses to chemicals. Of particular interest are chemicals, including drugs, that damage liver.

Dr. Lehman-McKeeman has active research interests and programs broadly in biochemical mechanisms of toxicity, with emphasis on secondary mechanisms of carcinogenesis. She is also working to develop and apply metabolomic and transcriptomic technologies to mechanistic toxicology.
